

## **Section 1 - Accounting**

### **Overview -**

A well designed and properly maintained accounting system is necessary to be able to provide all data that is needed to allow for the timely preparation of financial statements in conformity with generally accepted accounting principles. The official source of generally accepted accounting principles for local governments is the Governmental Accounting Standards Board (GASB). The Governmental Accounting Standards Board is an independent, not-for-profit organization that establishes and improves standards of financial accounting for local governments.

In addition, Section 218.33, Florida Statutes requires local governments to follow uniform accounting practices and procedures and a uniform chart of accounts as established by the Florida Department of Financial Services. These requirements are in place to assure proper accounting and fiscal management as well as to provide consistency in preparing local government annual financial reports.
